HOW SHOULD ASBESTOS BE DISPOSED OF?

WRAPPED AND SEALED

Wall to be removed

Plastic drop sheet

Full PPE must be worn

Secured with duct tape

Removed wall must be wet

Must be labelled

MUST BE wrapped + sealed with duct tape

WASTE SKIP

Then responsibly dispose at approved facility

The BEST way to deal with asbestos is to engage a licensed professional. Non-licensed tradespeople are only allowed to remove $10m^2$ of bonded non-friable asbestos.

WHAT IF I FIND A PIECE OF ASBESTOS AT HOME?

First wet the material to ensure fibres aren't loose. Use a plastic lunch bag to pick it up. Seal the bag and double bag it.

DISPOSE at approved facility
