

WHAT **NOT** TO DO WITH ASBESTOS

DON'T PANIC! If asbestos is in good condition and you don't disturb it while you're renovating, it's safe to leave where it is. However, single asbestos fibres are invisible to the naked eye and small enough to breathe in and get stuck in your lungs. So here are some of the risky jobs you should never do with asbestos

**CUTTING GRASS
NEAR ASBESTOS
FENCE**

SANDING

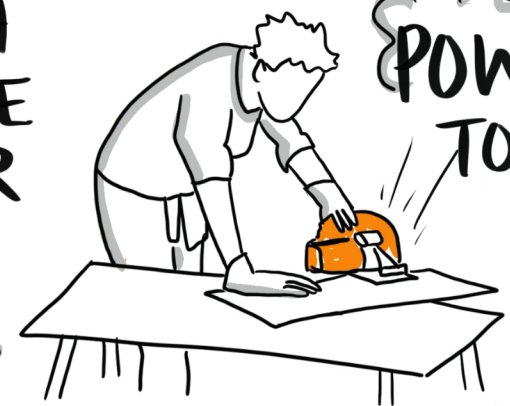

SWEEPING

**ANY HIGH
PRESSURE
WATER**

**POWER
TOOLS**

**THE BEST WAY TO DEAL WITH
ASBESTOS IS TO ENGAGE A
LICENSED PROFESSIONAL**
