

Prohibited use of water blasters

It is illegal to use a high pressure water blaster on asbestos cement roofs, fences and walls.

Using water blasters on asbestos materials:

Destroys the surface, spreads asbestos fibres widely and puts your health and your neighbours health at risk.

Super six asbestos roof

Asbestos wall sheeting

Shingle asbestos roof

Asbestos fence

Asbestos debris on a plant

Solution:

Instead of cleaning asbestos-containing materials, apply a fungicide and sealant. Visit your local roof restoration company, paint store or hardware store for product advice.

For asbestos information visit:

www.qld.gov.au/asbestos or call 13 QGOV (13 74 68)
